Mr. Mark McNulla
SST Components, LLC
780 Boston Road,
Billerica, MA 01821

Dear Mr. McNulla:

Re: JAN-JANTXV Manufacturer's Certification, MIL-PRF-19500P, FSC 5961, VQ(VQE-17-031205), CAGE: 9N185, Control # 055217.

Your facilities at 780 Boston Road, Billerica, MA, were audited by Mr. Zade Karadsheh and Mr. Brad Deslich of this Center, and Mr. Cristian Schuler representing Navy, on December 13-15, 2016 for compliance with the JAN - JANTXV Manufacturer's Certification requirements of MIL-PRF-19500P.

Compliance with these requirements has been successfully demonstrated; therefore, SST Components, LLC is considered a certified manufacturer eligible to qualify and supply JAN - JANTXV wire bondable Rectifiers, Switching Diodes, Zener Diodes, Temperature Compensated Zeners, Current Regulators, Transient Voltage Suppressors, Schottky Diodes, Silicon Controlled Rectifiers and Small Signal, Medium and High Power Transistors in accordance with the requirements of MIL-PRF-19500P. Certified assembly packages are: TO-18, TO-46, TO-71, TO-72, TO-78, TO-5, TO-39, TO-33, TO-66, TO-3, TO-254, TO-257, TO-258, UA, UB, UBC, U, U1, U2, U3, U4, 14-pin flat pack and 14-pin DIP. This certification is effective as of December 15, 2016.

Wafer fabrication will be utilized from your contracted facility, Texas Instruments located in Sherman, Texas. Also, medium and high power transistors wafer fabrication will be performed by your contracted wafer facility Bourns Ltd. located in Bedford, England. Device assembly is performed at your Billerica, MA facilities. All qualification tests, conformance inspections, and screening must be performed at your facilities or facilities that have DLA Land and Maritime-VQE Laboratory Suitability Status for each of the applicable test methods.

This certification will normally be valid for two years from the date of this letter and can only be terminated by written notification from this Center. For the duration of the certification, the manufacturer is subject to periodic reviews by the qualifying activity or its representatives. Certification will not normally be extended beyond the two-year period without a re-audit.

Note: The results of the DLA Land and Maritime-VQE audit held on December 13-15, 2016 were found by examining a sampling of the manufacturer's normal manufacturing, testing, and processing procedures. The acceptance of the corrective actions from the above referenced audit does not relieve the manufacturer of its contractual obligation to deliver product that complies with all specification requirements.

If you have any questions please contact Mr. Karadsheh at zade.karadsheh@dla.mil.

Sincerely,

for ALAN J. WILL
Chief
Sourcing and Qualifications Division
